

**Green Grow  
Paradise**

## WHO WE ARE

**Green Grow Paradise** is a licensed, operational cannabis farm in Thailand.

We have been active since the market was legalized **in 2022**.

- **400 kg** of finished product per harvest
- Continuous operation with **harvests every 5 months** (no downtime between cycles)

## KEY TO OUR SUCCESS

- **Own farm** operating without delays or restrictions
- **Wholesale** business model → **guaranteed** demand
- **Maximum optimization** of all internal processes

# GGP'S STABILITY IS DRIVEN BY:

1

**Competitive** dispatch pricing combined with **premium** product quality

2

**Significant energy** savings through outdoor cultivation

3

**Steady** wholesale sales

4

**A professional** international team

6

**In-house fertilizer** production

5

**Formal support** from Thailand's agricultural sector

7  
**Ongoing** product line **expansion**, including production of pre-rolled joints

**Green Grow  
Paradise**

## THE MARKET PROBLEM WE ADDRESS:

Over the past year Thailand received more than **35 million** tourists, of whom **5 million** are familiar with or engage in cryptocurrency, and over **1 million** purchase cannabis-containing products at Thai coffee shops.

Thailand has roughly 7,000 such coffee shops, where the average retail price is about **\$15 per gram**, while the wholesale price is approximately **\$1 per gram**.

This large gap between wholesale and retail prices allows cannabis producers to substantially increase their profits if they sell directly to end consumers.

# SOLUTION:

Green Grow Paradise NFTs act as a cannabis subscription: they entitle the holder to receive **30 grams** of product over a two-year period, totaling **150 grams** per NFT.

NFTs also **unlock** additional **earning opportunities**, extra **functionality**, and **BOOSTs** within other ecosystem tools.

# WHY BLOCKCHAIN:

Enables us to sell products to the **international** market.

As we **transition from B2B to B2P (business-to-person) to increase margins**, we need to build and cultivate a community around the brand. Blockchain makes it easy to create interoperable tools that work together across the ecosystem.

# INITIAL TOOLS:

## WEED TYCOON

PLAY TO EARN

**Our primary objective** is to increase profitability from product sales

The Green Grow Paradise ecosystem **gives** consumers **access to better offers** while allowing us, as producers, to earn more through direct engagement with the community via a unified ecosystem.

# PRE-SALE NFT-COLLECTION

24–28 DECEMBER

400 (\$)  
NFT pre-sale  
pricing
